Crusade for Health and Beauty

A healthier life

Tira's journey began when she was diagnosed with cervical cancer at the age of 21 and then again at 23. Refusing to become a victim of these circumstances, Tira started asking questions on what are the factors of cancers and how can we help prevent being subjected to this deadly disease. After reading many articles on studies performed and speaking to many professionals in the medical and chemical industries, she came to realize that we are doing it to ourselves. We are the number one cause! She never would have thought that our cosmetics and personal beauty products that we love and trust so much could turn out to be our #1 enemy to our health. This is where her crusade of educating on the deadly effects of chemicals in our daily products began.

With many years spent involved in the beauty industry, and the knowledge that came with it, Tira decided to conquer the cosmetic industry. With her experiences and education, she was now on the road to creating a product that there was no reason NOT to use!

After 3 years of research, LUVU Beauty was created. LUVU beauty is now known as a health wellness at home spa as well as a manufacturer of 100% natural cosmetics.

Our Mission

Our mission is to share with our clients new ways to incorporate healthier choices into their daily lives. LUVU Beauty provides luxurious services through an exclusive collection of natural and organic products. We consistently strive to research and develop the safest, highest quality products available while introducing unparalleled wellness information to the beauty community.

LUVU Beauty takes great pride in their cosmetic line. Affiliate companies are only introduced into the growing product line after research has been done on all ingredients. We personally try and test all outsourced products, and only allows companies that take as much pride and have as high expectations as us.

LUVU Beauty products are sold in select spas, salons and specialty stores worldwide. The knowledge and dedication to your health and beauty is often overlooked. Read the labels, ask for recommendations and remember: What you put on your skin is as important to your health as what you put in your mouth.

LUVU Beauty products are created from a simple premise: We use organic ingredients and keep dangerous chemical preservative systems, including parabens and additives out of the jar! We maintain the highest standards of quality throughout formulations and production.

In the pursuit of health and beauty, what you put on your skin is as important as what you put in your mouth.

Being Conscious

Are you aware that most personal care products, especially cosmetics and skin care lotions contain questionable synthetic chemicals like parabens and propylene glycol. These chemicals are linked to many different cancers, skin irritations, allergies and not to mention, the leading cause of wrinkles and acne. Be conscious, read your labels, do your research.

Breaking the Cycle

Good intentions are not good enough. Just because a product looks and claims to be organic doesn't mean it is. Canadian regulations state that if a product has one natural ingredient, the company can claim that product to be natural. Your first step to a healthier future starts with small changes. Start reading and understanding labels and ingredients. Be conscious, read your labels, do your research.
